Please be aware that all 800MHz frequencies used in San Diego between 851.0000 and 865.9875MHz are assigned from the SPLINTER bandplan. This means they are offset by 12.5kHZ (e.g., 856.0125 is not used, instead 856.0000 is used in its place). When programming any Motorola 3600 trunked system you must program the system as a splinter system.

It is recommended to program systems or sites using frequencies between 866.0000 through 868.9875 as splinter systems. This will not affect operation and tracking. If and when a site adds frequencies below 866MHz you will not need to change any system/site programming options.

Examples of splinter systems: San Diego County RCS and City of San Diego.

Frequencies

● Grouped ○ All ○ New/Updated ☐ Show Repeater Inputs

San Diego County

Sheriff

San Diego-Imperial County RCS NextGen Project 25 Phase II	San Diego County Sheriff has transitioned to the RCS NextGen system.	

Courts

San Diego-Imperial County RCS NextGen Project 25 Phase II	See San Diego County Sheriffs Dept talkgroups.

San Diego (City)

San Diego

FIRE - All general operations happen on the City trunked system. Each apparatus contains one 800MHz mobile radio and one VHF mobile radio (GE Phoenix). Bendix King portables are used for VHF. See "Codes and Maps" for VHF fleetmap.

San Diego City 800MHz Motorola Type II SmartZone	All city public safety agencies use this system (Police/Fire/EMS/Lifeguard/Shops).
San Diego City 700 MHz Project 25 Phase I	San Diego city public safety agencies are now in the process of transitioning to this system. As radios are reprogrammed, some talkgroups will only be active on one system or the other depending on user radio affiliation.
