

SIERRA COUNTY RESOURCE GUIDE

Definition of RESOURCE:

- *source of help*: somebody or something that is a source of help or information
- *backup supply*: a reserve supply of something such as money, personnel, or equipment
- *ability to find solutions*: adeptness at finding solutions to problems

Revised January 2023

Wellness Happens Here

706 Mill Street
Loyalton CA 96118
530-993-6728

22 Maiden Lane
Downieville CA 95936
530-289-3711

Wellness is physical, emotional, social, occupational, intellectual, financial, environmental, and spiritual.

Classes, Groups & Services:

- Peer Support – Youth & Adult
- Linkage to Veteran's Service Office
- WRAP-Wellness Recovery Action Plan
- Supportive Conversation
- Art and other meaningful activities
- Harm Reduction & Needle Exchange

Groups and activities added with interest.

Wellness Centers provide Whole Person Health support through education classes, peer support, life skills, community building, art & other activities which support wellness, recovery and resiliency.

All community members are welcome!

WOMEN, INFANTS, AND CHILDREN (WIC)

Program: The Women, Infants and Children (WIC) Supplemental Nutrition Program is a federally funded health and nutrition program for:

- Women who are pregnant, breastfeeding, or just had a baby
- Children under 5 years old (including foster children)
- Families with low to medium income (working families may qualify)

WIC provides:

- Special checks to buy healthy foods from WIC-authorized vendors—milk, eggs, bread, cereal, juice, peanut butter, and much more
- Information about nutrition and health to help you and your family eat well and be healthy
- Support and information about breastfeeding your baby
- Help in finding health care and other community services

To determine if you qualify or to apply, contact:

Bré Whitley
WIC Program Coordinator
202 Front Street
Loyalton, CA 96118
530-993-6700

HAM RADIO OPERATORS

HAM (amateur) radios can play an extremely important role in emergencies, because they provide a method of communication when cell phones and other communication channels fail. HAM radios can be used to keep the community informed or to get extra assistance in the event of a disaster.

Sierra County residents are encouraged to take the amateur radio license exam, as those listed below have done, so they can help their neighbors and communicate with others in extreme circumstances.

<ul style="list-style-type: none"> • Sandra Kendall, KK6CJJ 530-994-3710 • Beverly Mitchell, KK6CJM 530-994-3532 • Mike Perry, KA62MT 253-970-6271 • John Mitchell, W1RK 530-994-3532 • 	<ul style="list-style-type: none"> • Quentin Youngblood, KB5ZDL 530-836-1201 • Gregory Andal, AA7GT 530-993-1550 • Nancy Schlefstein, N5NRN 530-913-9218 • Scott Schlefstein, N5TEN 530-913-9218 	<ul style="list-style-type: none"> • John Ponta, KE6JAA 530-289-3586 415-827-0952

9-1-1 PHONE CALLS

9-1-1 calls made from cell phones in Sierra County are often routed to larger dispatch centers before being transferred back locally, causing a large delay in getting assistance.

When calling 9-1-1, **specify you are in Sierra County.**

To expedite the handling of an emergency call from your cell phone, call the Sheriff's Office Dispatch in Sierra County, instead of 9-1-1.

- Urgent Care

EASTERN PLUMAS HEALTH CARE

Loyalton Medical Clinic
725 Third Street
Loyalton, CA 96118
Phone: 530-993-1231 Fax: 530-993-4857

Days: Monday, Tuesday, Wednesday, and Thursday
CLOSED Fridays
Hours: 9AM-5PM (with a midday lunch break)

Services/Specialties available:

- Family Practice
- Podiatry

Lab Draws: Patients can avoid driving to Portola or Reno for routine lab tests. Labs are transported to Portola for processing. Please call clinic in advanced for most efficient time to come in.

LOYALTON SKILLED NURSING FACILITY

700 Third Street
Loyalton, CA 96118
Phone: 530-993-6100 Fax: 530-993-4528

- Licensed for 39 beds
- Personal care and activities
- Visitors / Entertainment / Outings / Spiritual enrichment, if desired
- Physical, and Occupational Therapy for those patients who qualify

In addition to long-term care services, therapies and rehabs are provided for post-surgical patients. People who perhaps had a hip replacement or other surgery can recover and get their physical and occupational therapy in Loyalton instead of staying in Reno.

American Red Cross Disaster Action Teams are activated when services are requested by the fire department in the event of a single- or multi-family residential fire. To request services call:

530-727-7335

The American Red Cross is able to provide for the **immediate emergency needs of those displaced individuals which may include food, clothing, and a hotel for up to 3 nights**. In the case where approximately 10 families or 20-30 people are involved, the Red Cross may choose to open a shelter. Red Cross Disaster Mental Health services are available for the emotional support of clients, as well as Health Services to assist clients with the replacement of their medications or glasses.

Canteen The American Red Cross may also provide canteen services when requested for a larger incident (fire, bus crash, etc.) to provide snacks, water, and coffee to fire crews, law enforcement, etc.

Evacuation Center An Evacuation Center is a temporary center for evacuees who have been displaced due to an incident. This center would not be for overnight use. Clients can receive briefings, get a snack, and find temporary shelter until the incident comes to an end or a decision is made to open a shelter.

Shelters A Red Cross shelter is for evacuees who have been displaced overnight by disaster. Red Cross shelters are carefully chosen by the Red Cross in conjunction with Health and Human Services and are capable of serving meals and housing large groups. Red Cross shelters are staffed by Red Cross volunteers and staff including Mental Health Services and Health Services.

***DISASTER HEALTHCARE VOLUNTEERS
of California***

On-line registration system for medical and healthcare volunteers:

<https://healthcarevolunteers.ca.gov/>

What does it take to register for disaster service?

1. During the on-line registration process, you will be asked to enter information regarding your license (if applicable).
2. Enter information about the best way to contact you, and other relevant background information.
3. Once you've registered, your credentials will be validated - before an emergency - so that you can be deployed quickly and efficiently. Your information will only be viewed by authorized system managers.

Floods

Floods are the most common and widespread of all natural disasters. If you live in an area where floods occur, you should know the following:

What to do before a flood

- Plan for evacuation, including where you will go and the route you will take.
- Purchase flood insurance and keep all insurance policies in a safe place.
- Take photos or a videotape of the valuables you keep in your home.
- Listen to your radio or television for reports of flood danger.
- Keep your car filled with gas.

What to do during a flood

- Do not try to walk or drive through flooded areas. Water can be deeper than it appears and water levels rise quickly. If your car stalls in floodwater, get out quickly and move to higher ground.
- Stay away from moving water; moving water six inches deep can sweep you off your feet. Cars are easily swept away in just two feet of water.
- Stay away from disaster areas unless authorities ask for volunteers.
- Stay away from downed power lines.
- If your home is flooded, turn the utilities off until emergency officials tell you it is safe to turn them on.
- Do not pump the basement out until floodwater recedes.
- Avoid weakened floors, walls and rooftops.
- Wash your hands frequently with soap and clean water if you come in contact with floodwaters.

What to do after a flood

- Wear gloves and boots when cleaning up.
- Open all doors and windows. Use fans if possible to air out the building.
- Wash all clothes and linens in hot water.
- Discard mattresses and stuffed furniture; they can't be adequately cleaned.
- Wash dirt and mud from walls, counters, and hard surfaced floors with soap and water.
- Discard all food that has come into contact with floodwater; canned food is okay.
- If your well is flooded, your tap water is probably unsafe. If you have public water, the health department will let you know if your water is not safe to drink. Until your water is safe, use clean bottled water.
- Do not use your septic system when water is standing on the ground around it.

Hot Weather Precautions

Severe heat may cause illness or even death. When temperatures rise to extreme highs, reduce risks by taking the following precautions:

Hot weather precautions to reduce the risk of heat exhaustion and heat stroke

- Stay indoors and in an air-conditioned environment as much as possible unless you're sure your body has a high tolerance for heat.
- Drink plenty of fluids but avoid beverages that contain alcohol, caffeine or a lot of sugar.
- Eat more frequently but make sure meals are balanced and light.
- Never leave any person or pet in a parked vehicle.
- Avoid dressing babies in heavy clothing or wrapping them in warm blankets.
- Make sure pets have plenty of water.
- If you take prescription diuretics, antihistamines, mood-altering or antispasmodic drugs, check with a doctor about the effects of sun and heat exposure.
- Cover windows that receive morning or afternoon sun. Awnings can reduce the heat entering a house.

If you go outside

- Plan strenuous outdoor activities for early or late in the day when temperatures are cooler; then gradually build up tolerance for warmer conditions.
- Take frequent breaks when working outdoors.
- Wear a wide-brimmed hat, sun block, and light-colored, loose-fitting clothes when outdoors.
- At first signs of heat illness (dizziness, nausea, headaches), move to a cooler location, rest for a few minutes, and slowly drink a cool beverage. Seek medical attention immediately if you do not feel better.
- Avoid sunburn: it slows the skin's ability to cool itself. Use a sunscreen lotion with a high SPF rating.
- Avoid extreme temperature changes. A cool shower immediately after coming in from hot temperatures can result in hypothermia, particularly for elderly or very young people.

If the power goes out or air conditioning is not available

- Ask your doctor about any prescription medicine you keep refrigerated. (If the power goes out, most medicine will be fine to leave in a closed refrigerator for at least three hours.)
- Keep a few bottles of water in your freezer; if the power goes out, move them to your refrigerator and keep the doors shut.

Power Outages

Power outages can cause many safety concerns; knowing the following information can help.

Before a power outage

- Register life-sustaining and medical equipment with your utility company.
- Consider buying a generator. Keep your generator outside and run a cord inside. Don't connect your generator to main service panels — it's dangerous!
- Your disaster preparedness kit should contain flashlights, a battery- powered radio, and a wind-up clock.
- Have a corded telephone available — cordless phones will not work when the power is out.
- Have a safe alternative heat source and supply of fuel. Never burn charcoal or use a generator indoors.

During a power outage

- Turn off lights and electrical appliances except for the refrigerator and freezer.
- Even if it is dark, turn light switches and buttons on lamps or appliances to the “off” position.
- Unplug computers and other sensitive equipment to protect them from possible surges.
- Leave one lamp on so you will know when power is restored. Wait at least 15 minutes after power is restored before turning on other appliances.
- Conserve water, especially if you use well water.
- Never use gas ovens, gas ranges, barbecues or portable or propane heaters for indoor heating—they use oxygen and create carbon monoxide that can cause suffocation.
- Candles can cause a fire. It's far better to use battery-operated flashlights or glow sticks for lighting.
- Using a kerosene heater, gas lantern or stove inside the house can be dangerous. Maintain proper ventilation at all times to avoid a build up of toxic fumes, and be sure to have a carbon monoxide detector.
- Stay away from downed power lines and sagging trees with broken limbs.

Keep food safe

- Use and store food carefully to prevent foodborne illness when power outages make refrigeration unavailable.
- Use foods first that can spoil most rapidly.
- Keep doors to refrigerators and freezers closed. Your refrigerator's freezer will keep food frozen for a day.
- Use an ice chest packed with ice or snow to keep food cold. Use bags of ice to save refrigerator foods.
- **If in doubt, throw it out.** Throw out meat, seafood, dairy products and cooked food that does not feel cold.

Preparing for Winter Storms

Winter storms can range from moderate snow over a few hours to blizzard conditions with blinding, wind-driven snow that lasts several days. Prepare before the snow falls and the ice freezes.

Preparing for winter storms

- Listen to your radio, television or on-line news for winter storm forecasts and other information.
- Prepare your home for cold weather. Install storm windows. Insulate outside walls, attics, and crawl spaces. Wrap pipes, especially those near cold outer walls or in attics or crawl spaces. Repair leaks in the roof, around the doors, and in the windows.
- Have appropriate cold weather clothing available.
- If you have a kerosene heater, refuel your heater outside and remember to keep it at least three feet from flammable objects.
- Make sure your fireplace functions properly.
- Have rock salt and sand on hand for traction on ice.
- Fill your gas tank before the snow starts falling.

During a winter storm

- Wear several layers of loose fitting, light weight, warm clothing rather than one layer of heavy clothing. Wear mittens rather than gloves. Wear a warm, woolen cap.
- Reduce the temperature in your home to conserve fuel.
- Heat only the areas of your home you are using. Close doors and curtains.
- Be sure to eat regularly. Food provides calories that maintain body heat.
- Watch for signs of frostbite and hypothermia — slurred speech, disorientation, uncontrollable shivering, stumbling, drowsiness, and body temperature of 95 degrees Fahrenheit or less.

In your vehicle

- Make sure someone knows where you are going. Stay on the main roads.
- If trapped in a blizzard, clear your tail pipe and run your engine and heater for 10 minutes every hour. Open your window slightly.
- During night hours, keep the dome light on in the car so rescue crews can see your vehicle.
- Keep an emergency kit in your vehicle. Include a three-day supply of water and non-perishable food that can be eaten without being cooked. Include a blanket or sleeping bag for each passenger, a flashlight, cell phone, shovel, sack of sand or kitty litter, booster cables, flare, and toilet paper.

TOBACCO USE REDUCTION PROGRAM TOBACCO IMPACTS...

Air and water quality

Health

Pollution

Wildfire

JOIN US!

Everyone can play an important role in protecting our environment, community members and youth from the risks of tobacco use.

Call (530) 993-6704 to learn more!

ENJOY SIERRA COUNTY SAFELY

When tobacco waste from e-cigarettes and cigarettes is not disposed of properly, it makes its way into our environment and pollutes the water, air and land.

Tobacco waste can also cause fires. According to the National Fire Protection Agency, smoking materials cause around 90,000 fires every year in the US.

Please extinguish all fires, including cigarettes, and pack out your trash.

Stay informed during all types of emergency events
